Investigator Narrative

Decedent: BELTRAM JR., Frank Alexander
Case Number: 2015-01484
Investigator: Rafael Plasencia

First Call Information:

On Sunday, May 10, 2015, about 0041 hours, Nurse M. Salamida called and reported the death of Frank Beltram Jr. Nurse Salamida reported the following: Beltram Jr. was a 50 year old male who died in the Emergency Department (ED) at Valley Care Medical Center in Pleasanton. Beltram Jr. was a Santa Rita Jail inmate that was transported to the ED by ambulance and was admitted at 1842 hours, for altered level of consciousness and respiratory distress. He remained in an altered state throughout his stay and was intubated due to respiratory distress. Beltram Jr. became unresponsive at about 2327 hours and life saving measures were attempted but unsuccessful and Dr. R. Kwak pronounced death at 2345 hours on 05/09/2015. (RRP1868)

Medical Summary:

**Alameda County Sheriff's Office****Gregory J. Ahern, Sheriff / Coroner****Coroner's Bureau, 2901 Peralta Oaks Ct.,****Oakland, CA 94605****(510) 382-3000 / (510) 382-3033 (fax)**

Beltram Jr. was identified by his Alameda County issued identification armband. The armband included a photograph which was used to identify him by his likeness to the photograph. (RRP1868)

On May 12, 2015, a fax was received from the Alameda County Central Identification Bureau (CIB) confirming that the fingerprints taken from the decedent were a match to the fingerprints associated with Person File Number: [REDACTED] with the name Frank Beltram. (KEE1917)

Next of Kin Investigation:

On Monday, May 11, 2015, about 0810 hours, I (Hovda) ran an account report for Frank Beltram. I called a phone number listed in the report for [REDACTED] and Frank Beltram in [REDACTED] and spoke to [REDACTED]. [REDACTED] told me the following; [REDACTED] is the uncle of Frank Beltram Jr. As far as [REDACTED] knew, Frank Beltram Jr. was not married and had one minor child. [REDACTED] did not know the child's name or contact information. [REDACTED] is Frank Beltram's mother and lived at the same residence. [REDACTED] was asleep and could not come to the phone. I provided the Alameda County Coroner's Bureau phone number and case number to [REDACTED] stated he would notify [REDACTED] of her son's death and give her the information when she woke up. (JSH1432)

On Monday, May 11, 2015, about 1500 hours, I (Hovda) called [REDACTED]. I was told [REDACTED] had called Santa Rita Jail and inquired about her son Frank Beltram's medical condition. [REDACTED] stated she was concerned about the medical care her son was receiving and was checking on his well-being. I informed [REDACTED] her son had died and of the Coroner's Bureau involvement in this case. [REDACTED] told me the message I left with [REDACTED] earlier that day had not been forwarded to her by her brother. [REDACTED] informed me [REDACTED] may have forgotten because he is slightly mentally handicapped.

Alameda County Sheriff's Office
Gregory J. Ahern, Sheriff / Coroner
Coroner's Bureau, 2901 Peralta Oaks Ct.,
Oakland, CA 94605
(510) 382-3000 / (510) 382-3033 (fax)

[REDACTED] told me the following about her son Frank Beltram Jr.: Frank Beltram was divorced and has two sons, [REDACTED] and [REDACTED]. [REDACTED] is a minor [REDACTED] and [REDACTED] is an adult. [REDACTED] lives with [REDACTED] and she will inform him of his father's death. (JSH1432)

On Monday, May 11, 2015 about 1745 hours, [REDACTED] called the Coroner's Bureau and identified herself as the legal wife of Frank Beltram Jr. [REDACTED] stated she was notified of Frank Beltram's death on Monday, May 11, 2015 about 1500 hours by [REDACTED]. [REDACTED] stated she is still legally married to Frank Beltram Jr. and will be making funeral arrangements in this case with the assistance of [REDACTED]. [REDACTED] stated she never filed divorce paperwork from Frank Beltram Jr. (JSH1432)

On Monday, May 11, 2015, about 1800 hours, I (Hovda) called [REDACTED] and informed her of [REDACTED] claim of still being legally married to Frank. [REDACTED] stated she was not positive her son had divorced. She stated Frank signed divorce paperwork but did not know if the paperwork was ever filed. [REDACTED] stated she and [REDACTED] will be making funeral arrangements together in this case. I informed [REDACTED] that [REDACTED] is the legal next of kin in this case. (JSH1432)

Other Agency Reports:

Refer to Alameda County Sheriff's Office report #15-007958. (RRP1868)

On July 16, 2015, I (Plasencia) printed a copy of Alameda County Sheriff's Office report #15-007958 for review and included it in the case file. The report was consistent with the information originally reported to me with the addition of a signed statement from another inmate that stated Beltram Jr.

Alameda County Sheriff's Office
Gregory J. Ahern, Sheriff / Coroner
Coroner's Bureau, 2901 Peralta Oaks Ct.,
Oakland, CA 94605
(510) 382-3000 / (510) 382-3033 (fax)

[REDACTED] According to his toxicology report, no common acidic, neutral, or basic drugs or alcohol was detected. (RRP1868)

Property and Evidence:

I (Plasencia) issued property receipt #36043 for the body, clothing, and property items in this case to Deputy McDaniel #2130. (RRP1868)

As of May 12, 2015, all property items in this case were released to Beltram Jr.'s wife, [REDACTED] (RRP1868)

Coroners Fees:

As of May 10, 2015, Coroner's fees including body removal (\$254) and body preparation (\$67) fees totaling \$321.00 apply in this case. (RRP1868)

As of July 14, 2015, all associated fees in this case were paid in full. See Accounting Receipt #06613. (RRP1868)

Investigative Details:

Alameda County Sheriff's Office

Coroner's Bureau, 2901 Peralta Oaks Ct.,
Oakland, CA 94605
(510) 382-3000 / (510) 382-3033 (fax)

On May 10, 2015, about 0235 hours, Deputy Unubun and I (Plasencia) arrived at Valley Care Medical Center in Pleasanton. Beltram Jr. was lying face up on a hospital bed in the Emergency Department. He was wearing a hospital gown. There was medical therapy attached to Beltram Jr.'s body and everything was left in place. I examined his body and saw no signs of foul play or trauma.

Deputy Unubun and I moved Beltram Jr. onto a gurney and into the Coroner's van for transportation back to the Coroner's Bureau without incident.

About 0310 hours, Deputy Unubun and I arrived at Santa Rita Jail in Dublin. I met with Sgt. Leca, who was the acting Watch Commander for the day, and he provided me with Beltram Jr.'s booking information, personal property, money, and copies of his in custody medical records. He advised me that at about 0006 hours, the Records Deputy spoke to US Marshal Deputy Clopper #4940 and advised him of Beltram Jr.'s death. According to intake records from Santa Rita, Beltram Jr. was booked into custody on 04/01/2015, by the US Marshals. (RRP1868)

On Saturday, May 23, 2015, about 0910 hours, I (Meldrum) spoke to Santa Rita Jail Sergeant Lenthe. Sergeant Lenthe told me there were inmates that knew Beltram Jr who said he was [REDACTED]

[REDACTED] The inmates said Beltram Jr had been [REDACTED]

[REDACTED] (MMM1859)

According to Santa Rita Jail Mental Health records, Beltram Jr. had no psychiatric history. (RRP1868)

On May 11, 2015, Coroner's Pathologist Dr. Thomas W. Rogers conducted a full autopsy on Beltram Jr. The cause of death was deferred due to a request for toxicology and histology. (RRP1868)

Alameda County Sheriff's Office
Gregory J. Ahern, Sheriff / Coroner
Coroner's Bureau, 2901 Peralta Oaks Ct.,
Oakland, CA 94605
(510) 382-3000 / (510) 382-3033 (fax)

On May 12, 2015, Central Valley Toxicology (CVT) conducted a complete drug screen on hospital samples and a post mortem femoral blood sample from Beltram Jr. The complete drug screen yielded the following results: No common acidic, neutral or basic drugs detected. No Ethyl Alcohol detected. (RRP1868)

On May 14, 2015, Jay Becker from Pittsburg Funeral Chapel arrived at the Coroner's Bureau to take possession of Beltram Jr. for his final disposition. [REDACTED] authorized the release and Coroner's fees were not paid at this time. (RRP1868)

On June 25, 2015, Dr. Rogers gave the following cause of death: Cardiac insufficiency due to acute myocardial infarction due to coronary atherosclerosis. (RRP1868)

Findings:

On Thursday, July 16, 2015, I (Plasencia) reviewed this case to determine a manner of death. A full autopsy on Frank Alexander Beltram Jr. was performed by Coroner's Pathologist Dr. Thomas W. Rogers to determine a cause of death. Dr. Rogers listed the cause of death as, "Cardiac Insufficiency," with secondary conditions of, "Acute Myocardial Infarction and Coronary Atherosclerosis." Based on the listed cause of death, I determine the manner of death for this case to be natural. (RRP1868)

Supervisor Review:

On August 4, 2015, I (Sergeant P. Wilson) reviewed this case for closure. I agree with the findings and consider this case closed. (PW#1494)

SUBJECT: AUTOPSY PROTOCOL

Autopsy performed upon the body of Frank Alexander Beltram Jr. at the Coroner's Bureau, 2901 Peralta Oaks Court, Oakland, California, on May 11, 2015, at 9:15 a.m.

AUTOPSY FINDINGS

- 1) GENERALIZED ATHEROSCLEROTIC CARDIOVASCULAR DISEASE:
 - A) CARDIOMEGALY
 - B) ACUTE MYOCARDIAL INFARCTION (MICROSCOPIC DIAGNOSIS)
 - C) CORONARY ATHEROSCLEROSIS
 - D) AORTIC ATHEROSCLEROSIS
 - E) GRANULARITY OF KIDNEYS.
- 2) REMOTE RIGHT THORACOTOMY:
 - A) PROBABLE PARTIAL PNEUMONECTOMY
 - B) ADHESIONS, RIGHT PLEURAL CAVITY.
- 3) CHRONIC PASSIVE CONGESTION, LIVER.
- 4) DIABETES MELLITUS:
 - A) EARLY KIMMELSTIEL-WILSON DISEASE (MICROSCOPIC DIAGNOSIS).

CAUSE OF DEATH: CARDIAC INSUFFICIENCY DUE TO ACUTE MYOCARDIAL INFARCTION DUE TO CORONARY ATHEROSCLEROSIS.

Body of FRANK ALEXANDER BELTRAM JR.

1 EXTERNAL EXAMINATION

2 The body is that of a male, stated age of 50 years. There
3 is a Coroner's identification tag present on the left big toe.
4 The body is 70 inches long and weighs 245 pounds.

5 The body is presented in a supine position with the head in
6 the normal position. Both arms lie alongside the body. The
7 body is nude. Paper bags cover the distal aspects of both arms.

8 Rigor mortis is passing. Lividity is present over the
9 backside of the body.

10 There is the following evidence of MEDICAL THERAPY:

- 11 1) A medical band about the right wrist.
- 12 2) A dressing covering the dorsal aspect of the right hand. Removal of this does not reveal a needle puncture mark.
- 14 3) A vascular catheter in the right antecubital fossa.
- 15 4) Cardiac monitoring pads on the torso, both lower legs and both upper arms.
- 17 5) Electrical conduction pads on the torso.
- 18 6) A dressing covering a blunt injury on the dorsal aspect of the right foot.
- 20 7) A dressing covering a blunt injury on the dorsal aspect of the left foot.
- 22 8) A Foley catheter in the external genitalia.

Sheriff-Coroner
Alameda County

Body of FRANK ALEXANDER BELTRAM JR.

- 23 9) An oral-gastric tube in place.
24 10) Two medical bands about the left wrist.
25 11) A vascular catheter on the dorsal aspect of the left hand.

- 27 12) Hospital specimens attached to the left big toe.

28 There are the following BLUNT INJURIES to the body:

29 HEAD AND NECK:

30 None present.

31 RIGHT ARM:

32 None present.

33 LEFT ARM:

34 None present.

35 RIGHT LEG:

- 36 1) A 3/4-inch eschar over the tibial tubercle.
37 2) A 1/2-inch eschar on the lateral knee.
38 3) A healing abrasion on the dorsal aspect of the foot.

39 Granulation tissue is present in its base.

40 LEFT LEG:

- 41 1) A 1/2-inch healing abrasion on the dorsal aspect of the foot, with granulation tissue in its base.

43 TORSO:

44 None present.

Sheriff-Coroner
Alameda County

Body of FRANK ALEXANDER BELTRAM JR.

45 The hair is black, graying, and 1/4 inch long. Pupils are
46 round. Irides are brown. Sclerae are white. No petechial
47 hemorrhages are noted. Ears, nose and lips are normal. A short
48 mustache and beard are present. There is a 1-inch, puckered,
49 well-healed scar over the midline of the neck.

50 The chest is flat. Breasts are consistent with an adult
51 male. In both axillary areas are a moderate number of
52 papillomatous-appearing skin tumors. These range upwards to
53 3/8 inch in greatest dimension. Over the right side of the
54 torso, roughly over the chest, are approximately seven well-
55 healed scars. These are irregularly shaped and range upwards to
56 1 inch in greatest dimension. In addition, there is a well-
57 healed right thoracotomy scar. The abdomen is mildly obese. A
58 small umbilical hernia is present. The external genitalia are
59 nonremarkable.

60 There is mild pitting edema of both ankles. Legs and feet
61 are without further abnormalities.

62 The fingernails have been clipped prior to autopsy. Arms
63 and hands are nonremarkable. No binding indentation sites are
64 present about the arms or hands. No smoke, powder or stippling
65 is identified on either arm or hand. No needle puncture marks
66 are present. No hyperpigmented scars are present over

Sheriff-Coroner
Alameda County.

Body of FRANK ALEXANDER BELTRAM JR.

67 accessible veins. No blunt injuries are noted to arms or hands.

68 The back is normal.

69 INTERNAL EXAMINATION

70 The body is opened through the usual Y-SHAPED INCISION.

71 BODY CAVITIES: The left pleural cavity is lined by a
72 smooth, glistening surface and contains about 300 cc of clear
73 yellow effusion. The right pleural cavity is mostly closed by
74 fibrous adhesions. The pericardial sac and peritoneal cavity
75 are lined by smooth, glistening surfaces. Ribs and diaphragms
76 are intact.

77 HEART: In situ, the heart is enlarged, with the apex
78 beyond the left midclavicular line. The heart weighs 630 grams.

79 The epicardial surface is smooth and glistening. Ventricular
80 myocardium is brown. There is a vague 3/8-inch area of
81 hemorrhage in the posterior wall of the left ventricle. A
82 microscopic section is taken. There is mild four-chamber
83 dilatation of the heart. Valves are normal. Coronary ostia are
84 patent. There is severe calcific coronary atherosclerosis
85 making examination difficult. This is particularly noticeable
86 in the left circumflex and the right coronary arteries. No
87 thrombi are present.

88 VESSELS: The aorta and tributaries are severely involved

Sheriff-Coroner
Alameda County

Body of FRANK ALEXANDER BELTRAM JR.

89 with atheromatous change. The pulmonary artery and venous
90 system contain no thromboemboli.

91 TRACHEA AND BRONCHI: Lined by pale yellow mucosal
92 surfaces.

93 LUNGS: The left lung weighs 1120 grams. It has a smooth
94 surface. It is prominently congested and edematous. Its airway
95 and vessels are nonremarkable.

96 The right lung weighs 240 grams. It is prominently adhesed
97 into the right pleural cavity. Some parenchyma may be
98 iatrogenically missing, consistent with an earlier partial
99 pneumonectomy. Suture material is identified. The parenchyma
100 of the right lung is slightly congested and edematous and rather
101 firm. Its airways and vessels are nonremarkable.

102 ORAL CAVITY: Most teeth are chronically missing. The
103 tongue is normal.

104 ESOPHAGUS: Lined by a white, wrinkled mucosal surface.

105 STOMACH: Contains 100 cc of brown food material. The
106 mucosal surface is tan. No tumors or ulcers are noted.

107 INTESTINES: Covered by smooth serosal surfaces. No
108 abnormalities are noted.

109 LIVER: Weighs 3500 grams. The serosal surface is smooth
110 and glistening. The anterior margin is rounded. The parenchyma

Sheriff-Coroner
Alameda County

Body of FRANK ALEXANDER BELTRAM JR.

111 is brown and prominently congested. A nutmeg pattern is
112 present, consistent with chronic passive congestion.

113 GALLBLADDER: The gallbladder is of normal size. Its
114 surface is smooth. Its wall is of normal thickness. It is
115 lined by a green velvety mucosal surface. It contains 10 cc of
116 bile and no stones.

117 PANCREAS: The pancreas is of normal size. Its parenchyma
118 is yellow-brown and lobulated. No tumors are present. No
119 saponification is noted.

120 SPLEEN: The spleen weighs 570 grams. Its capsule is gray
121 and smooth. Its parenchyma is red-purple and soft.

122 ADRENAL GLANDS: The adrenals are normal in size and have
123 their usual triangular shape. Sectioning of them reveals non-
124 remarkable cortex and medullary parts. No hemorrhages are
125 present.

126 KIDNEYS: The left kidney weighs 300 grams. The right
127 kidney weighs 290 grams. Surfaces are prominently granular.
128 Parenchyma is brown and moderately congested. There is a
129 distinct corticomedullary separation. Papillae are normal. The
130 calyces and pelves of both kidneys are nonremarkable. No
131 obvious abnormalities are noted of the ureters. No stones are
132 present.

Sheriff-Coroner
Alameda County

Body of FRANK ALEXANDER BELTRAM JR.

133 BLADDER: The bladder contains no urine. It is lined by a
134 tan mucosal surface. No trabeculation or tumors are present.
135 No diverticula are noted.

136 PROSTATE: The prostate is of normal size. Its parenchyma
137 is yellow-white and rubbery. No tumors are noted.

138 TESTICLES: Normal.

139 MUSCULOSKELETAL SYSTEM: No abnormalities noted.

140 NECK: The hyoid bone and laryngeal structures are intact.

141 Soft tissue about the larynx is normal. The larynx is free of
142 obstructing material. The cervical vertebral column is non-
143 remarkable. The thyroid gland is of normal size. Sectioning of
144 it reveals a nonremarkable red-brown parenchyma.

145 CENTRAL NERVOUS SYSTEM: Soft tissue about the cranial
146 vault is normal. The brain weighs 1300 grams. The gyri and
147 sulci of the cerebral hemispheres are normal. Sectioning of the
148 brain reveals no abnormalities. No contusions are noted. The
149 ventricular system of the brain is nonremarkable. No subdural
150 or subarachnoid hemorrhages are present. The vessels at the
151 base of the brain are nonremarkable. Stripping the dura from
152 the inner table of the skull reveals no abnormalities.

153 SPECIMENS:

154 1) Heart's blood

CASE NUMBER: 2015-01484	CASE NAME: Frank Alexander Beltram Jr.
PATHOLOGIST: Thomas Wayne Rogers, M.D.	HISTOLOGICAL EXAMINATION

HEART: There is a focal area of recent scarring characterized by the presence of fibroblasts. This is consistent with a recent myocardial infarction. A few hemosiderin-laden macrophages are present. In an area close to this is a very early neutrophilic infiltrate. Rare areas of muscle necrosis are noted. These findings are consistent with an acute myocardial infarction.

LUNG: In some areas there are a moderate number of alveolar macrophages present. Otherwise, no abnormalities are noted.

LIVER: Congestion is present. No further abnormalities are noted.

PANCREAS: The pancreas is autolyzed but otherwise nonremarkable.

SPLEEN: Nonremarkable-appearing red pulp and white pulp areas are present.

KIDNEY: Numerous hyalinized glomeruli are present. Some of these have the appearance of Kimmelstiel-Wilson disease. Focal areas of lymphoid infiltrates are also noted.
